

EIA Transglutaminase IgG

EAN Code: 8595635303722 Catalog number: tTG096 Package size: 96 tests Storage: 2-8 °C Producer: TestLine Clinical Diagnostics s.r.o.

Description:

- Recombinant h-tTG antigen is bound to the surface of the wells of the microtiter plate.
- If specific antibodies are present, they bind to the antigen, are labeled by the Conjugate in the following steps and are detected by color reaction with a single component substrate (TMB-Complete).
- The kit allows 96 tests, including controls in a split microtiter plate with color-coded strips and breakable wells.

Advantages:

- The total assay time is about 1 hour 30 minutes.
- High sensitivity and specificity of the test.
- Kit includes CUT-OFF, Positive Control, Negative Control and Calibrators (5, 20, 50, 100 U/ml).
- Semi-quantitative evaluation in the Index of Positivity (IP) or quantitative evaluation in U/ml.
- Ready-to-use, color-coded components.
- Single-component substrate.
- Interchangeable components with the exception of kit specific components (Controls, Conjugate,

Plate).

Application:

- Screening test for detection of coeliac disease.
- Monitoring of gluten free diet effect.

Brief assay procedure:

- 1. Dilute samples (1:101).
- 2. Pipette Controls and diluted Samples.
- 3. Incubate at 37°C for 30 min.
- 4. Aspirate and wash the wells $5 \times$
- 5. Pipette Conjugate.
- 6. Incubate at 37°C for 30 min.
- 7. Aspirate and wash the wells $5 \times$
- 8. Pipette Substrate (TMB-Complete).
- 9. Incubate at 37°C for 15 min.
- 10. Pipette Stop Solution.
- 11. Read color intensity at 450 nm.
- 12. Evaluate the test.
